

Patient Reminder Checklist

No intercourse for 48 hours before exam.

No vaginal medication, personal lubricants or douching 48 hours before exam.

Schedule appointment 2 weeks after first day of the patient's last menstrual period.

Patients who have had a hysterectomy, are older than 65 or who have had chemotherapy may be atrophic and therefore require special consideration when it comes to their cervical care.⁷

Visit hologic.com/thinprep for more details and best practices for Pap collection.

ThinPrep
PAP TEST

Pap Collection Guide

A Map to Success

Maximize the power of the Pap by following these navigational tips for proper collection and improved patient care.

ThinPrep
PAP TEST

Exploring Unsatisfactory Results

Approximately 1-2% of all Pap tests, regardless of testing method, will be returned as an UNSAT.¹

- ▶ An UNSAT can be a sign of an increased risk of an underlying disease.²
- ▶ High-risk populations tend to have higher UNSAT rates.³

26%

Unsatisfactory specimens from patients with ASCUS or SIL²

Up to 4x

Greater risk of CIN2/3 than normal Pap³

Excessive amounts of noncellular material (blood, mucus or lubricant) can interfere with the collection process and potentially cause an UNSAT.

Exploring Menses

The Pap should never be collected during menses since the presence of blood can be diagnostic.

- ▶ Collection during menses is discouraged, per societal guidelines.⁴
- ▶ No Pap test is validated for collection during menses.

Exploring Lubricant

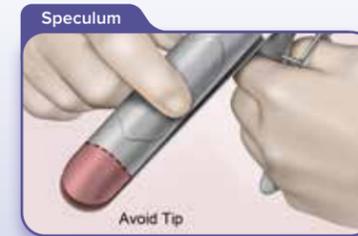

Excessive lubricant use interferes with sample adequacy.⁵

- ▶ Avoid carbomer lubricants.
- ▶ Only use a dime-sized amount.
- ▶ Personal lubricant use impedes proper sampling.

A Map to Success with the ThinPrep® Pap Test

1 Prepare Speculum

- ▶ Warm water is preferred
- ▶ Only use carbomer-free lubricants
- ▶ Dime-sized amount

If lubricant is required, the following lubricants are validated for use with the ThinPrep® Pap Test.

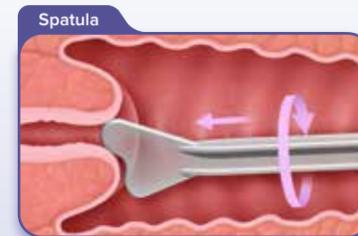

Lubricant	Manufacturer
✓ Pap Test Lubricating Jelly	Aseptic Control Products
✓ SurgiLube Surgical Lubricant	HR Pharmaceuticals
✓ CerviLube	Sion Biotext

Contact your medical supplies distributor for purchasing details.

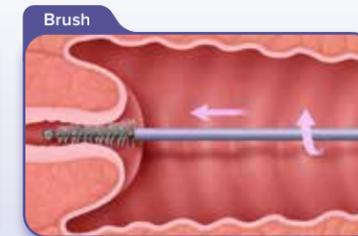

2 Obtain Sample

Sample collection for the ThinPrep® Pap Test may be performed with a spatula/brush combo OR a broom-like collection device.⁶

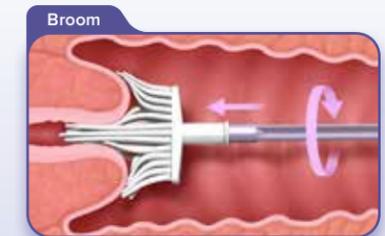

- ▶ Rotate per manufacturer's guidance
- ▶ Do not over rotate

Rotate the contoured end **360° 1x**

Rotate in one direction **1/4 to 1/2**

Rotate clockwise **360° 5x**

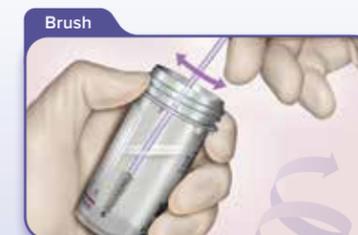

3 Rinse Device Immediately

The ThinPrep collection process preserves and fixes the cells in the solution, not on the device head.

- ▶ Sanitary collection — fingers remain on the handle, not the brush

Swirl **vigorously 10 times**

Rotate while pushing against the vial wall **10 times** and swirl **vigorously**

Push into bottom of vial forcefully **10 times** and swirl **vigorously**

⊘ DO NOT leave device in vial
